GLOBAL VATAX AFFILIATE PROGRAM

VAT is one of the most widely-used forms of taxation globally. Proponents believe it is the fairest way to tax economic activity because it distributes the tax obligation for goods or services among all businesses involved in its production.

Most companies are unaware of the foreign VAT reclaim opportunity, lack expertise, see the reclaim process as overly complex and required resource investment too great.

Most companies that pursue VAT reclaim opportunities don't capture the full values since they lack country specific expertise and experience, suffer from poor quality data and record keeping and don't have systems to accommodate the VAT refund process. Reclaim applications are often rejected due to missing information or mistakes.
